ANALYTIC SUBJECT INDEX

Age-dependent dynamics
– First passage step count number versus first passage time in— - Vlad and Pop 155 (1989) 311
Age-dependent master equations
– A physical interpretation of— - Vlad and Pop 155 (1989) 276
Aggregation
– Diffusion-limited—near the percolation threshold - Meakin et al. 155 (1989) 1
Aging (see *Spin glass, Ising*) 155 (1989) 431
Alloys, binary
– Binary alloys. Statistical theory of non-equilibrium states. Kinetics of ordering - Bondarev 155 (1989) 123

Bernoulli systems
– Faithfulness property of the transition from—to irreversible Markov processes - Courbage et al. 155 (1989) 167
Bethe Lattice (see *Spin glass, Ising*) 155 (1989) 206
Bi-Hamiltonian systems
– Bi-Hamiltonian dynamical systems related to low-dimensional Lie algebras - Błaszak and ojciechowski 155 (1989) 545
Binary alloys
– —. Statistical theory of non-equilibrium states. Kinetics of ordering - Bondarev 155 (1989) 123
Binary fluid mixture
– Some analytic results for a— - Ding and Hauge 155 (1989) 189
Binary mixtures
– Line shape in the EELS of— - Gerasimov 155 (1989) 175
Boltzmann equation (see *Two phase turbulent flow*) 155 (1989) 105
Bonhöffer–Van der Pol model (see *Isochrones*) 155 (1989) 565
Brownian suspension (see *Colloidal dispersions*) 155 (1989) 475

Canonical ensemble
– Simplified virial expansions in the— - Loss et al. 155 (1989) 373
Classical real gas
– Simplified virial expansions in the canonical ensemble - Loss et al. 155 (1989) 373
Cluster variation method, simplified
– A simplified cluster variation method - Morita 155 (1989) 73
Collapsed oscillations, revival of
– Revivals in a two-atom single-mode system - kozierowski et al. 155 (1989) 254
Colloidal dispersions
– Nonequilibrium statistical mechanics of concentrated—:hard spheres in weak flows with many-body thermodynamic interactions - Wagner and Russel 155 (1989) 475
Continuous growth model (see *Growth models, deterministic*) 155 (1989) 37
Crystal field, random
– Magnetic properties of the mixed spin system with a random crystal field -

Kaneyoshi 155 (1989) 460

D-vector models
– Phase diagrams for random-bond— - Lyra and Coutinho 155 (1989) 232
Debye relaxation (see *Polarization, electric*) 155 (1989) 84
Decorated lattice
– Random field Ising model on a semi-decorated square lattice - Horiguchi and Gonçalves 155 (1989) 265
Dielectric relaxation (see *Polarization, electric*) 155 (1989) 84
Diffusion-limited aggregation
– —near the percolation threshold - Meakin et al. 155 (1989) 1
Diffusion-limited reactions
– Reaction and adsorption on multifractal substrates - Meakin 155 (1989) 21
Dipole-forbidden resonance (see *Electron energy-loss spectroscopy*) 155 (1989) 175
Dissipative fluxes
– Fluctuation theory and extended irreversible thermodynamics - Jou 155 (1989) 221

Effective field distribution (see *Spin glass, Ising*) 155 (1989) 206
Electron energy-loss spectroscopy
– Line shape in the EELS of binary mixtures - Gerasimov 155 (1989) 175
Extended irreversible thermodynamics
– Fluctuation theory and— - Jou 155 (1989) 221

Ferromagnets, heterophase
– Spin-phonon interactions in heterophase ferromagnets - Yukalov 155 (1989) 519
First passage time
– First passage step count number versus—in age-dependent dynamics - Vlad and Pop 155 (1989) 311
Fluctuation spectrum peaks
– —for systems where the oscillation frequency dependence on energy has an extremum - Soskin 155 (1989) 401
Fluctuation theory
– —and extended irreversible thermodynamics - Jou 155 (1989) 221
Fluctuations, heterophase (see *Heterophase ferromagnets*) 155 (1989) 519
Fractal dimension (see *Turbulence, intermittent*) 155 (1989) 585
Frustated spin system
– Thermodynamics of a frustrated spin system: renormalization group approach and scaling - Lacerda et al. 155 (1989) 337

Gas–liquid transition
– A mean-field approach to the—II - Maćkowiak 155 (1989) 352
Growth models, deterministic
– Deterministic screened growth models - Meakin 155 (1989) 37
Growth process (see *Diffusion-limited aggregation*) 155 (1989) 1

H-theorem (see *Irreversible dynamical systems*) 155 (1989) 385
Hard-sphere suspension (see *Colloidal dispersions*) 155 (1989) 475
Heterophase ferromagnets
– Spin-phonon interactions in— - Yukalov 155 (1989) 519

Internal time (see *Turbulence, intermittent*) 155 (1989) 585
Irreversible dynamical systems
– An explicit approach to the Λ-operator and the H-theorem in the Prigogine theory of irreversibility - Suchanecki et al. 155 (1989) 385
Irreversible processes
– Faithfulness property of the transition from Bernoulli systems to irreversible Markov processes - Courbage et al. 155 (1989) 167
Ising chain, random (see *Spin glass, Ising*) 155 (1989) 431
Ising model, antiferromagnetic (see *D-vector models*) 155 (1989) 232
Ising model, random field
– Random field Ising model on a semi-decorated square lattice - Horiguchi and Gonçalves 155 (1989) 265
Ising model on triangular lattice
– Thermodynamics of a frustrated spin system: renormalization group approach and scaling - Lacerda et al. 155 (1989) 337
Ising model (see *Cluster variation method, simplified*) 155 (1989) 73
Ising spin-1/2 system
– Surface magnetism in a random surface field - Kaneyoshi and Li 155 (1989) 116
Ising spin system
– Magnetic properties of the mixed spin system with a random crystal field - Kaneyoshi 155 (1989) 460
Isochrones
– —and the dynamics of kicked oscillators - Campbell et al. 155 (1989) 565

Λ-operator (see *Irreversible dynamical systems*) 155 (1989) 385

Lattice gas model (see *Binary alloys*) 155 (1989) 123
Lie algebras (see *Bi-Hamiltonian systems*) 155 (1989) 545

Magnetic properties (see *Ising spin system*) 155 (1989) 460
Many-body interactions (see *Colloidal dispersions*) 155 (1989) 475
Markov processes
– Faithfulness property of the transition from Bernoulli systems to irreversible— - Courbage et al. 155 (1989) 167
Markovian(, non-) jump process (see *Age-dependent dynamics*) 155 (1989) 311
Markovian process, non-homogenous (see *Age-dependent master equations*) 155 (1989) 276
Mean field approach (see *Gas–liquid transition*) 155 (1989) 352
Mean field renormalization group (see *D-vector models*) 155 (1989) 232
Multifractal substrates
– Reaction and adsorption on— - Meakin 155 (1989) 21

One-dimensional spin system (see *Spin glass, Ising*) 155 (1989) 431
Oscillation frequency, extreme (see *Fluctuation spectrum peaks*) 155 (1989) 401
Oscillators, kicked
– Isochrones and the dynamics of kicked oscillators - Campbell et al. 155 (1989) 565

Percolation threshold (see *Diffusion-limited aggregation*) 155 (1989) 1
Periodic potential model (see *Fluctuation spectrum peaks*) 155 (1989) 401
Phase transition curve (see *Isochrones*) 155 (1989) 565

Polarization, electric
– Dispersion and dynamics of third-order electric polarisation in liquids within Smoluchowski–Debye theory - Alexiewicz 155 (1989) 84

Quenched random system (see *Ising model, random field*) 155 (1989) 265

Random walk (see *Multifractal substrates*) 155 (1989) 21
Relaxation properties (see *Two-level systems*) 155 (1989) 52
Renormalization group approach (see *Ising model on triangular lattice*) 155 (1989) 337

Self-similarity (see *Turbulence, intermittent*) 155 (1989) 585
Shear, weak (see *Colloidal dispersions*) 155 (1989) 475
Smoluchowski equation (see *Polarization, electric*) 155 (1989) 84
Spin glass, Ising
– The distribution function of the effective field of the Ising spin glass on the Bethe lattice for the coordination number $z=4,5,6$ - Sasaki and Katsura 155 (1989) 206
– Nonequilibrium dynamic and aging in a one-dimensional Ising spin glass - Koper and Hilhorst 155 (1989) 431
Spin system, Ising
– Magnetic properties of the mixed spin system with a random crystal field - Kaneyoshi 155 (1989) 460
Spin–phonon interactions
– Spin-phonon interactions in heterophase ferromagnets - Yukalov 155 (1989) 519
Surface field, random (see *Ising spin-1/2 system*) 155 (1989) 116
Surface magnetism (see *Ising spin-1/2 system*) 155 (1989) 116
System–bath coupling (see *Two-level systems*) 155 (1989) 52

Three-dimensional gas (see *Gas–liquid transition*) 155 (1989) 352
Threshold growth probability model (see *Growth models, deterministic*) 155 (1989) 37
Transition events (see *Age-dependent dynamics*) 155 (1989) 311
Turbulence
– Boltzmann equation approach to two phase flow— - Domokos et al. 155 (1989) 105
Turbulence, intermittent
– A new probabilistic description for intermittent turbulence: internal time - Nagata and Katsuyama 155 (1989) 585
Two-atom single-mode system
– Revivals in a— - kozierowski et al. 155 (1989) 254
Two-level systems
– Relaxation properties of—in condensed phases - Romero-Rochin and Oppenheim 155 (1989) 52
Two phase turbulent flow
– Boltzmann equation approach to two phase flow turbulence - Domokos et al. 155 (1989) 105

Vapour–liquid transition
– A mean-field approach to the gas–liquid transition II - Maćkowiak 155 (1989) 352
Virial expansions (see *Canonical ensemble*) 155 (1989) 373

Wetting (see *Binary fluid mixture*) 155 (1989) 189
